

CREATIVE CORNER:

Artificial Intelligence and Human Flourishing

DEPARTMENT OF FINE ARTS, DHACSS COLLEGE FOR WOMEN, KARACHI, PAKISTAN

The human brain is the source of intelligence, imagination, empathy, and resilience. These qualities define humanity and form the foundation of health, wellbeing, and progress. As artificial intelligence becomes an integral part of everyday life, its greatest value lies in enhancing human intelligence while preserving human values. Guided by ethics, wisdom, and compassion, the partnership between the human mind and artificial intelligence has the potential to transform healthcare, education, research, and society. AI and Human Flourishing reflect a future where technology and humanoid intelligence converge to foster healthier societies, meaningful progress, and sustainable development for future generations.

DHACSS College for Women (DCW) is a multidisciplinary college that was founded in 1990 with the mission of providing young women with a wholesome education to equip them for the challenges of the future. Since its humble beginnings, DCW has progressed significantly, grown in reputation, and experienced incredible success. It is now recognised as one of the best contemporary institutions for maintaining exceptional academic standards. This artwork was created for one of the convocation ceremonies of DCW.
